RETURN TO CIA LIBRARY

The best arsenal in Yugoslavia is the Yugoslav Navy arsenal at Tivat, which employs about 2,000 persons, many of whom are well trained and have had pre-war experience. Electricity is supplied to arsenal power plants by means of a modern network from power plants in Boka.

Map Identifications:

1. An old Diesel power plant, used as a reserve source of power.
2. A hangar-shaped brick building, 80 by 15 meters, with a flat roof, containing boiler workshops, large cutting machines, machines for bending sheet metal for boilers, large capacity cranes on tracks.
3. Forge, built before the war.
4. Shipbuilding shop, where boats and small floating craft are constructed of wood. Ship ramp has a capacity of 100 tons.
5. Machine shop, containing an unspecified number of turning lathes, drilling and other machines, as well as large capacity cranes. A carpentry shop is in one part of this building.
6. Administrative building, containing offices, laboratories, technical departments and other offices.
7. Foundry, equipped with a Bessemer converter, equipment for casting and smelting iron and steel, and a model shop.
8. Repair shop for electrical equipment.
9. Tinsmith.
